

ASWIN A K

AI Engineer · RAG & Agentic AI · Full-Stack Developer

Email: aswinakofficial435@gmail.com Phone: +91 88485 90435 LinkedIn: [aswinakofficial](#) GitHub: [aswinakofficial](#)

What I Deliver

AI Engineer and **Microsoft Certified Azure AI Engineer Associate (AI-102)** with production experience at **EY Global Delivery Services**, where I build enterprise-grade AI and data systems used by global teams. I specialize in **RAG pipelines**, **Agentic AI**, and **LLM orchestration** — turning AI experiments into reliable, scalable production systems. I also build full-stack web/mobile applications and intelligent workflow automation for businesses of all sizes.

Available for: AI/ML projects · RAG & chatbot development · Data engineering · Full-stack web/app development · N8N automation · API development

Core Skills

AI & LLM	RAG (Retrieval-Augmented Generation), Agentic AI, LLM Orchestration, LangChain, NeMo Guardrails, NLP, Computer Vision
Data Engineering	Databricks, Apache Spark, ETL Pipelines, Vector Databases, Data Mining, SQL
Languages	Python (Expert), JavaScript / TypeScript, Dart, PHP, SQL
Frameworks	React.js, Next.js, Node.js / Express, Flutter, Django, WordPress
Cloud & DevOps	Azure (AI-102 Certified), Docker, Kubernetes, CI/CD (GitHub Actions), Linux
Automation	N8N Workflows, SharePoint API, REST APIs, OData, SAP BTP

Certifications

Microsoft Azure AI Engineer Associate (AI-102) — 2026

Azure AI Fundamentals (AI-900)

Azure Fundamentals (AZ-900)

Professional Experience

EY Global Delivery Services (GDS) · *Product Engineer — Data & AI*
India (Full-time)

Jul 2024 – Present

- **Enterprise RAG System:** Built a production-grade RAG pipeline on **Databricks** that indexes and retrieves knowledge from millions of unstructured tax documents, enabling accurate AI-assisted research for internal EY teams.
- **Automated ETL Pipelines:** Engineered scalable data ingestion workflows from **SharePoint** into Databricks vector stores, converting large document repositories into queryable embeddings.
- **AI Security Tooling:** Developed a **Python**-based automated vulnerability scanner for the InfoSec team, reducing manual code review time while maintaining enterprise compliance standards.
- **Agile Delivery:** Collaborated with cross-functional global teams within the EY Mobility Pathway ecosystem, delivering production AI features under Agile sprint deadlines.

Projects & Freelance Work

RexAI — Agentic AI Platform · HackLoop 23 Hackathon · Top 5 Finalist

2023

- Built an agentic AI web application that automates customer support via an intelligent, multi-turn chatbot using Generative AI.
- Implemented real-time data processing with **Python** and **React.js** within a 24-hour sprint.

StethoConnect — IoT Audio Pipeline · Personal Project

- Developed an IoT solution using **Raspberry Pi** and **Python** for real-time audio streaming and remote medical monitoring.
- Built backend REST APIs to process, stream, and visualize live physiological data.

Full-Stack Web & Mobile Applications · Client & Personal Projects

- Delivered SaaS web applications using **React** / **Next.js** frontend and **Node.js** / **Django** backend with REST API integrations.
- Built cross-platform mobile apps with **Flutter** and e-commerce solutions on **WordPress** / **WooCommerce**.
- Designed and deployed **N8N automation workflows** to connect business tools and eliminate manual processes.

Education

CUSAT (Cochin University of Science and Technology) · *B.Tech in Information Technology* May 2024
CGPA: 8.59 / 10 Relevant: Artificial Intelligence, Data Structures, DBMS, Linux OS
